

## Job Opening: Program Manager

**Locations: Santa Clara, CA**

We are seeking a **Program Manager** in our Santa Clara, California office to lead the connected vehicle programs with automotive OEMs, Semiconductor Chipset suppliers, and Tier-1 system providers from around the world. As a key member of the Customer Program Management Team for Savari, this role requires an expert in program management with a solid technical background who will be responsible for working with the company's engineering, sales and executive teams to coordinate program planning, insure execution, and assist in project related customer interface.

### Roles and Responsibilities

- Define program schedules, milestones and work based on the customer roadmap and requirements
- Manage the progress of the defined program milestones and deliverables, define the countermeasures to keep the program timeline in case of deviations
- Work with engineering to translate customer requirements into specific tasks for all functional areas and actively. Collect track and drive all open issues to closure
- Communicate the issue status to the customer and internal teams located on different geographical zones
- Identify and accurately represent the priority of customer issues and raise them appropriately
- Work closely with the engineering, and the Sales team to resolve technical, administrative and logistic issues
- Regularly communicate the program status and key issues to customer and Savari management
- Drive and manage on time execution of the programs
- Develop a close working relationship with the customers' development teams and be the first point of contact for major program issues
- Manage relationship with vendors to ensure ASPICE compliance and timely delivery that meets the necessary requirements
- Implement new internal processes for tracking, management, alignment, and transparency to scale this framework to additional programs

### What We're Looking For

- Have 5+ years of experience in the project/program management in Automotive or Embedded Industry for software products
- Experience implementing/working in ASPICE is a plus
- A strong software technical background and experience working with customers in an OEM environment
- Experience in handling global projects with multinational program members
- BS/MS in Engineering or Computer Science; MBA with prior technical background is a plus
- PMP Certification preferred (significant experience in the area can be considered as a substitute)
- Experience with stakeholder management
- Excellent communication and presentations skills

## **Ways to Stand Out from the Crowd**

- Track record in managing complex software product development programs in automotive industry
- Leadership in coordination of different functional teams towards the same target
- Good communication, negotiation and organization skills.
- Dedicated and able to work with a minimum supervision

With highly competitive salaries and a comprehensive benefits package, Savari is widely considered to be one of the most desirable startups in the Automotive industry. If you're a capable leader, good communicator, and a creative problem solver with a sincere passion for technology, we want to hear from you.
